# Swarf Briquetter

Model: BQ-

## Design

The Swarf Briquette Press is a heavy duty, robust, quality manufactured machine capable of producing high value, high density swarf briquettes from chips or: Steel, Aluminium, copper & Cast Iron. There is an inlet feed hopper & ram, Main Press cylinder, punch & die, Hydraulic oil pumping station & full PLC control system. All to European CE regulations.

## Function

The chipped material to be Briquetted is fed into the inlet hopper. The feed ram fills the swarf into the pressing chamber. Once filled the fast feed cylinder initially compresses followed by the main cylinder to create the high density briquette. The finished briquette is pushed out of the chamber into customers bin.

Options: Larger inlet hopper with Automatic feeding conveyor and output conveyors. Shredder unit prior to feeding so bushy swarf can be reduced to chips.

## Applications

Our Horizontal Briquetting Press is a cost effective choice for the small, medium & large company to create High value from your companies waste stream.
